Math Professor

The Math Professor is an arithmetic tutorial designed to improve both speed and accuracy. Each of the twenty lessons emphasizes different operands and degrees of complexity. Each lesson is comprised of an accuracy and speed test.

In the accuracy test, the student practices the given expressions at a comfortable speed. With each lesson, the level of difficulty increases and the prior drills are reinforced. The test is completed when twenty consecutive equations are solved correctly.

In the speed test, the student works to solve twenty equations as quickly as possible. At the completion of the speed test the Math Professor evaluates the student's performance. If the student completes the drill satisfactorily, the student will be advanced to the next lesson. If the student's performance is less than satisfactory, the present lesson is repeated.

The "RETURN" key must be pressed after each answer or command. The return key will also clear the display area after an incorrect answer has been entered. "BACKSPACE" will erase the last character entered.

Control P will suspend the drill.
Control B will end the present lesson.
Control C to reboot.
