

# LICA

## LONG ISLAND COMPUTER ASSOCIATION

President, AL STONE    Vice President, BOB KOWITT    Secretary, JACKIE TULUMELLO    Treasurer, AILEEN HARRISON  
CBBS (516) 561-6590    STACK ADDRESS: P.O. BOX 71    HICKSVILLE N.Y. 11801 (516) 997-3653    Editor, AL LEVY

Volume.6 No.3

## THE STACK

April 1982

### PRESIDENT'S MESSAGE

LICA is going to sponsor a flea market in September. It won't be accompanied by a great indoor commercial bourse like the TCF. It probably won't be as large as the twice-yearly LIMARC flea market or the Newark flea market/show. What we hope it will be will be fun...and mutually profitable to the vendors, the attendees, and to LICA.

LICA can do many exciting and meaningful things if we can increase our income. The obvious benefits are a bigger STACK, a more sophisticated CBBS, and the corporate acquisition of extraordinary hardware and software as may occasionally become available. Our membership dues are only \$12 per year, yet nearly 40% of the attendees at our General and User Group meetings are not currently paid-up members of the overall Association!

We can't change the world - and we can't change human nature. What we can do is work like hell on the organization and planning, promotion, and ultimate operation of the LICA flea market. I don't want to draft anyone - what I'm looking for are sincerely motivated volunteers like the first few who constituted the initial survey committee which came up with at least one suitable site, and two probable dates for this thing. We'll need plenty of help up to and including the actual date in the Fall.

Both the Suffolk County Computer Association and the New York Amateur Computer Club have contacted us and requested to be included in our plans. Come on, folks. Let's make this "first annual" event the success it should be.

### =====

### MONTHLY MEETING

### =====

LICA meets each month on the third Friday evening at 8:00 in Room 508, Building 500, The New York Institute of Technology, Old Westbury Campus. The APRIL meeting will take place on the 16th. The speaker will be RALPH KENYON, who will speak about and demonstrate "Little Ada". This is a complete compiler system for a limited subset of the new DOD language. Mr. Kenyon will offer copies of the DOD books containing complete outlines for ADA. Members can refer to the last 4 issues of "MICROSYSTEMS" in which they will find a 4 part article, (by Ralph Kenyon), documenting the theory, philosophy, & codes for "Little Ada".

## THE SECRETARY'S REPORT MARCH 1982 MEETING

Harry Phillips announced that the Long Island Computer Association is now filed as a non-profit corporation in the State of New York.

It was decided that our flea market will be held September 18th or 25th. The exact location will be announced later. Anyone wishing to help out should contact a member of the committee (Aileen Harrison, Phil Cochem, or Larry Adkins) or an officer of LICA.

LICA now has the LEXICON MODEM to rent to members by the month. Anyone interested in renting it should contact Aileen Harrison.

The CP/M Users Group, chaired by Bob Kowitt, will begin meeting again.

Augie Schwabb announced that he will be stepping down as leader of the S-100 subgroup. Augie's responsibilities will be assumed by his co-chairman, Richard Wilson. For five years, Augie has unselfishly brought his wit, generosity and ability to the S-100 sub-group. This, plus his relentless and extremely capable ability to run thoroughly engrossing meetings, with a heaping dose of qualified speakers, enlivened discussions, probing questions, etc. has made the S-100 club a model for any other organization, amateur or professional. From the membership of S-100 .....**THANKS AUGIE.**

Two months ago, Ron Richards was invited (on very short notice) to speak to LICA on the subject of "rotating media." His treatment of floppy disks created so much interest that he was invited back to continue his discussion. His topic at this meeting was "Hard Disk Technology".

Ron told us that hard disks will always be more expensive than floppy disk, but compensate because of their great storage capacity and lack of wear phenomena. The information transfer rate is 10 times faster than a floppy. The rotation speed is between 1200 and 2400 RPM. In response to the enquiry of a member, he distinguished between the terms "hard disk" and "Winchester". The Winchester is defined by the type of head and the method by which the head flies close to the disk. The environment of the disk must be hyper-clean, as dirt or oxide coating destroys the aerodynamics of the head and causes the head to crash onto the disk, (a "disk-crash").

He discussed strategies for a backup of a hard disk system and pointed out the advantages of tape as opposed to floppies for a backup. Ron spoke of the problems of removable hard disk, which could be a serviceman's nightmare.

Ron's reply to a question concerning the cleaning of read-write heads inspired our editor to pick up his seldomly used screw driver and clean his heads, (he has three). Unfortunately, when he finished reassembling, there was a part left over. In his attempt to put it back, the part broke. With the able assistance of co-member Angelo Tulumello, via Ma Bell, he was able to reconstruct and repair the broken part. Whether our editor is a hack or a hacker we believe that he now has a clean head.

(But not necessarily aligned. ED)

## NOTICES

The New York Computer Show will be held Thursday through Sunday April 22-25, at Nassau Coliseum, Uniondale, Long Island. Show hours are 11:AM to 6:PM daily. The show is open to the public and admission is \$5 for adults, \$3 for children. The exposition features computers for business, industry, scientific and engineering applications, government, education, home and personal use.

There will be 80,000 square feet of display space, containing over 50 million dollars worth of equipment. On display will be computers ranging in cost from \$75 to \$75,000. The latest in software will also be introduced. Among the participating manufacturers are IBM, NEC, Digital, Wang, Radio Shack, Atari, Commodore, Quantel, Heathkit, Apple, and CPT.

Dealers and retailers from Long Island will be selling right at the show. For more information, contact Northeast Expositions, 824 Boylston Street, Chestnut Hill MA 02167. TEL(617)-739 2000

### 68000 Micro News

A new magazine has been announced which will deal exclusively with the Motorola 68000 microprocessor and related hardware and software products. The 68000 is available from several companies on the S-100 bus and Intel Multibus. The magazine "68000 Micro News" is looking for articles, letters and people who are willing to be contributing editors. Subscription rates are \$25 per year for 12 issues. Mr. Dave Bollman, (president), can be reached on computer bulletin boards (215) 435-3388 (24 hour) or (215) 398-3937 (24 hour RBBS) or by phone at (215) 439-8888.

### APPLE, TRS-80 & OTHER MICROCOMPUTER OWNERS

Modify EPSON MX-80 Cable to defeat Out-Of-Paper switch  
by: Ed Fischer

.....

sending ESC 8 will DEFEAT Out-Of-Paper switch.

sending ESC 9 will let switch function normally

This worked on my MX-80 F/T with and without GRAFRAX

1. Cut wire going to pin 12 of the MX-80 connector.
2. Cut wire going to pin 16 of the MX-80 connector.
3. Tie wire from TRS that WAS going to MX pin 12, TO MX pin 16.
4. DO NOT connect the loose wires A and B to anything.
5. Tape (insulate) exposed ends of wires A and B.

Epson Connector Pin No.	TRS-80 Connector Pin No.
-------------------------------	--------------------------------

12 -----X cut A /----- 'out of paper' 23	
tie> / <together	
16 -----/ B cut X----- 'logic ground' 31	

.....

\* Correction submitted for my Mailist  
Routine printed in the March edition of  
The Stack. Line 150 should have read:  
150 A\$=N\$(B)

In response to some criticism, the  
backslash "\" is a line divider. I  
believe that many systems use a  
semi-colon for the same purpose. Poke  
0,160 means "Blank the Cursor". Last  
but not least, "---- Screen Display  
Below ----" was not part of the program !  
The Screen Display was from my "Real  
Program", The code was prepared for The  
Stack ie. they didn't match exactly.  
The program is used to create a "Command  
File", (CP/M "Submit"), which allows the  
user to type a number plus an identifier  
for searching a Mailist for a particular  
name. I use many disks for the Mailist  
and don not want to remember the names  
of all the files, nor do I want to  
answer all of the prompts which are part  
of the Mailist program. The command  
file does all of the work after it has  
gotten the two pieces of information  
requested.

# JULTRONICS COMPUTER SERVICES

## COMMERCIAL ADVERTISING POLICY

In an effort to cover our costs of duplication and mailing, and to provide a more extensive monthly edition of THE STACK, commercial display ads are accepted in 1/4, 1/2 and Full Page sizes. Minimum participation is for three months. The three month rates are \$45, \$65, and \$100 respectively. Copy need not be the same each month. Camera ready preferably. Type setting & layout work available at additional charge.

All checks should be made payable to LICA

The Long Island Computer Association is open to everyone, amateur or professional, with an interest in computers, computer applications, programming, or related subjects. Dues are \$12.00 per year which includes monthly issues of this publication.

The STACK is also mailed to other computer clubs on an exchange basis as well as to various technical publishers. Permission for reprinting or quoting items in The STACK is granted providing that credit is given & a copy of the reprint is sent to The STACK. Members can vote in club elections, & place non-commercial classified ads (at no charge) and commercial ads at nominal cost.

Member articles and other data affecting The STACK must be received by the 15th day of any month, to be published in the following issue. All copy should be sent to:

Al Levy P.O. Box 71 Hicksville N.Y. 11802 (516) 997-3653
