HARDWARE SPECIAL OF THE MONTH

MICROSOFT HARDWARE

SOFTCARD

Microsoft's SoftCard is a hardware/software system for the Apple II or II Plus that greatly increases the software capability of the Apple. With SoftCard installed, your Apple runs the CP/M operating system. Microsoft BASIC-80 and other CP/M-based software, all of which have been unavailable to Apple users until now. And SoftCard adds these capabilities without altering use of the Apple in its normal 6502 mode.

RAMCARD

RAMCard is a 16K memory card for the Apple II or II Plus that provides a low-cost alternative to the Apple Language Card for Apple owners who require additional memory.

RAMCard may be used with SoftCard to provide a 56K CP/M system.

\$359.00 FOR BOTH!

NEXT MONTH IN SoftSide™

These programs
for the S-80,
Apple, and Atari:

QUEST

Can you find
treasure, do
battle with
monsters, and
still get out of
the dungeon
alive?

BATTLEFIELD

Eliminate your
enemy on the
battlefield in this
two-player game.

Plus:

Part 2 of our
VARPTR series,
the final
installment of
"Lemonade or
Champagne",
"S-80 Video
Reverse", and
"Computer
Graphics".

Premier Issue

TRS-80™ :

NEWBASIC

Enhances

TRS-80™

Model I BASIC

NEWBASIC adds new commands and utilities to the S-80 Model I Level II or Disk BASIC.

Some of the Disk BASIC enhancements are a spooler, despooler, and a new directory command which may be issued while in BASIC.

Utilities included in both the Disk and Level II versions are "quick key" BASIC keyword entry, blinking block cursor, auto key repeat, and lower case display enable, plus two powerful debugging aids.
