3. The game will load and execute automatically
4. When asked if using an RGB monitor answer Y or N
5. When instructed insert the 'DATA' disk in drive 0

PLAYING INSTRUCTIONS

STARTING THE GAME:

Move the right joystick up or down to select the number of players. Press the right joystick button to start the game.

CONTROLLING YOUR SPACESHIP:

You control your spaceship with the joystick. You can move left and right as well as up and down. You use the button to fire your missiles. You may also use the <SPACEBAR> to launch a smart bomb (if you have any) which will destroy everything on the screen.

THE SCREEN LAYOUT:

At the top of the screen is a display showing how many men you have left as well as the number of smart bombs you currently have. If you fly your ship over the flashing square with a bomb in it you will receive a bonus smart bomb. The area below the display is the playing section where all the action occurs. Just to the right of the playing section is your ship's energy bar. The bar goes down each time you get shot or collide with a spaceship. When it reaches zero you lose one ship. If you fly your ship over the flashing <E> square it will raise your ship's energy back to full. On the very right of the screen is the high score list. Below the high score list is the message box. This will give you messages about different events that occur during the game.

THE ENEMY:

The enemy comes in many different shapes and forms. There are many different flying spaceships that will fire at you, as well as many different types of land bases, some of which will also fire at you. Force fields can't be shot. To destroy a force field, you must destroy the generator which is usually located near the source of the force field. You will also encounter mother ships at various points in the game. To destroy a mother ship you must shoot its center several times.

PAUSE:

You may pause a game by pressing the <P> key. To resume your game press <ENTER>.

BONUS SHIPS:

You receive your first bonus ship at 10,000 points. You will receive a bonus ship for every 20,000 points scored after the first.

SCORE:

FLYING SHIPS	VARYING POINT VALUES
HELICOPTER ON PAD	..	200 POINTS
RADAR DISH	50 POINTS
BLINKERS	100 POINTS
CYCLOPS CANNON	300 POINTS
TANKS	400 POINTS
FORCE FIELD	500 POINTS
MOTHER SHIP	2,000 POINTS
